QA Automation Engineer

Experience: 3 to 5 years

Location: Pune

Job Description

We are seeking a skilled QA Automation Engineer with strong expertise in Selenium WebDriver, Python, and Robot Framework. The ideal candidate should be capable of independently designing, developing, and executing automated test scripts while ensuring comprehensive defect tracking and reporting.

Key Responsibilities

Design and develop automated test scripts using Selenium WebDriver with Python and Robot Framework

Execute automated and manual test cases to ensure software quality

Independently manage testing activities including test planning, execution, and reporting

Collaborate closely with development and product teams in an Agile environment

Provide detailed documentation and analysis of defects, test results, and quality metrics

Required Skills & Qualifications

Strong proficiency in Python programming

Hands-on experience with Selenium WebDriver and Robot Framework

Solid understanding of manual testing methodologies, SDLC/STLC, and Agile practices

Strong analytical and problem-solving abilities

Excellent verbal and written communication skills

=====

We're Hiring: Automation Test Engineer – Selenium / Java / Playwright

Location: Pune / Indore (Hybrid/Onsite)

Experience: 4+ Years

Type: Full-Time | Immediate Joiners Preferred

Are you a skilled Automation Engineer looking to enhance your career in a dynamic tech environment? We're hiring a Java/Test Automation Engineer to help us build scalable and efficient testing solutions. If you're experienced in Selenium, Java, and JavaScript, and have a passion for test automation frameworks—we'd love to connect!

#### What You'll Do

Develop and maintain automation test scripts using Selenium & Java

Build and improve automation frameworks using JavaScript-based tools

Collaborate with cross-functional teams to define testing needs

Create and execute detailed test plans, cases, and strategies

Work on Oracle Applications (FIN/SCM or HCM) automation

Utilize tools like GitLab, Jenkins, Azure, ALM, JIRA for CI/CD and test management

Perform backend validation using SQL

Participate in Agile processes, code reviews, and knowledge sharing

#### Must-Have Skills

Strong hands-on experience in Selenium, Java, and JavaScript

Familiar with automation frameworks (TestNG, JUnit)

Experience with Oracle Applications (FIN/SCM or HCM)

Proficiency in SQL, CI/CD tools, and Linux/Windows environments

Strong communication, problem-solving, and documentation skills

#### Good to Have / Can Be Trained On

Experience with Playwright or Cypress

Familiarity with Page Object Model and framework design

Exposure to DevOps, WDIO, or other test automation tools

Willingness to learn and adopt new tools like Playwright (we can train you!)

Know someone who fits the bill or want to apply yourself?

Send your resume to [manav.agrawal@infobeans.com](mailto:manav.agrawal@infobeans.com) with the subject line:

"Job Application - Java/Test Automation"

=====

We're Hiring: Python Test Automation Developer

Position: Python Test Automation Developer

Location: Pune

Experience: 5 to 8 years

Qualification: B.E. in IT / Computer Science

Required Skills & Technologies:

- Strong Object-Oriented Programming (OOPs) knowledge in Python/Java/C++
- Proven experience in writing test automation scripts in Python
- Hands-on with Python Unit Testing Frameworks
- Strong analytical, design, debugging, and coding skills
- Good English communication skills

Nice to Have:

Experience with MS Windows UI Automation tools like PyWinAuto

Web automation skills using Selenium or similar tools

Familiarity with PyQt, FastAPI, REST API, HTML, CSS, Jinja, JavaScript

Experience with defect management tools, version control systems (Git/SVN)

Development experience using Eclipse IDE or similar

Drop your CV to: [teresa@proqubix.com](mailto:teresa@proqubix.com)

Hiring for Senior Quality Analyst

Location: Pune

Type: Full-time

About the Role:

We are looking for a skilled Senior Quality Analyst with 2–3 years of experience in software testing and quality assurance to join our team. In this role, you will be responsible for ensuring the quality and functionality of our products through detailed testing, identifying defects, and collaborating with development teams to ensure the delivery of high-quality software. Key Responsibilities • Develop and execute test cases, scripts, plans, and procedures for web and mobile applications. • Perform functional, regression, integration, and performance testing. • Identify, document, and track bugs and issues using issue tracking tools (e.g., Jira, Bugzilla). • Work closely with development and product teams to understand project requirements and provide feedback on potential quality risks. • Participate in test case reviews, status meetings, and retrospectives. • Automate test cases where appropriate to improve efficiency and repeatability. • Ensure test coverage is aligned with project goals and requirements. • Analyze test results and provide detailed reports to stakeholders. • Continuously improve QA processes and practices within the team. • Strong understanding of QA methodologies, tools, and processes

We are Hiring!!!!

Job Title: Senior QA Engineer (DevOps, Kubernetes, and Optimization)

Location - Pune (Hybrid)

Interview Rounds - 2 rounds (In-Person and virtual)

Key Responsibilities:

- Design, develop, and execute automated and manual test plans for backend and infrastructure components.

- Integrate QA processes within CI/CD pipelines using modern DevOps tools and practices.
  - Evaluate and optimize system performance, scalability, and reliability.
  - Develop test strategies and automation frameworks for Kubernetes-native applications and microservices.
  - Conduct root cause analysis for defects and performance issues and work cross-functionally to drive resolution.
  - Contribute to release readiness by validating deployment strategies in staging and production-like environments.
  - Monitor and improve test coverage and QA metrics across the engineering organization.
- Required Qualifications:
- 5+ years of experience in Quality Assurance, with at least 2+ years in a senior or lead role.
  - Proficiency in writing and maintaining automated test suites (e.g., Pytest, JUnit, Selenium, etc.).
  - Hands-on experience with Kubernetes, including testing and validating deployments, scaling, and health checks.
  - Strong knowledge of DevOps tools (CI/CD, Docker, Jenkins/GitHub Actions, Helm, etc.).
  - Experience with performance, load, and stress testing tools (e.g., JMeter, Locust, k6).
  - Strong understanding of microservices, APIs, and distributed systems testing.
  - Excellent problem-solving skills and attention to detail.
  - Effective communication and collaboration skills in a cross-functional team environment.

Preferred Qualifications:

- Experience with service mesh (e.g., Istio, Linkerd) and observability tools (e.g., Prometheus, Grafana, ELK).
- Background in SRE or performance engineering is a plus.
- Familiarity with cloud infrastructure (AWS, GCP, or Azure).
- Contributions to open-source QA, testing, or DevOps projects.
