We have Great Opportunity for QA Engineers!

Job Title: QA Engineer (Manual & Automation - Playwright)

Location: Bangalore (Whitefield)

Experience: 3+ Years

Employment Type: Full-time

Contact: [Shubhi.Verma@quesscorp.com](mailto:Shubhi.Verma@quesscorp.com)

#### About the Role:

We are looking for a skilled QA Engineer with a strong background in manual testing and test automation using Playwright to join our team. The ideal candidate should have hands-on experience testing complex B2B and enterprise applications, a keen eye for detail, and a passion for quality. You will collaborate closely with developers, product managers, and other stakeholders to ensure a smooth and efficient testing lifecycle.

#### Key Responsibilities:

- Design, develop, and execute manual test cases for web-based B2B and enterprise-grade applications.
- Develop and maintain automated test scripts using Playwright (JavaScript/TypeScript).
- Perform regression, functional, integration, and end-to-end testing.
- Identify, log, and track bugs using standard defect tracking tools (e.g., Jira).
- Collaborate with cross-functional teams to understand requirements and ensure comprehensive test coverage.
- Participate in Agile ceremonies like sprint planning, daily stand-ups, and retrospectives.
- Continuously improve testing processes, tools, and best practices.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

**Required Skills & Experience:**

- 3+ years of experience in software testing, with a mix of manual and automated testing.
  - Strong experience in Playwright (JavaScript or TypeScript).
  - Deep understanding of QA methodologies, tools, and processes.
  - Experience testing B2B or enterprise-level web applications.
  - Strong analytical and problem-solving skills.
  - Familiarity with tools such as Jira, TestRail, Git, or similar.
  - Ability to write clear and concise test cases and bug reports.
- 

 Hiring Alert – Face-to-Face Drive | Bangalore 

We are hiring for a leading product-based company, and conducting a face-to-face interview drive in Bangalore on 31st May for the following roles:

- ⭐ Role : Associate Consultant & Consultant [Testing (Full Stack)]
- 📌 Experience: 1.6-5.6 Years
- 📌 Notice Period: Max 30 days

**Role Focus(Associate Consultant):**

- ◆ Execution-level testing tasks
- ◆ Test case design
- ◆ API/UI automation
- ◆ Basic AI/ML testing (using PyTest, DeepChecks, etc.)
- ◆ Scope: More hands-on, learning-oriented, works under guidance

**Role Focus Consultant :**

- ◆ Advanced testing and validation (especially for LLMs)
- ◆ Regression suites, fairness/bias validation using DeepChecks
- ◆ Mentorship responsibilities
- ◆ Scope: More independent, decision-making, and technical ownership

Send your resume to:

 [kavyab@gkhrconsulting.com](mailto:kavyab@gkhrconsulting.com) / [chaitras@gkhrconsulting.com](mailto:chaitras@gkhrconsulting.com)

---

 We're Hiring: Senior QA Lead (6–9 Years Experience)  Location: Bangalore 

Experience Required: 6–9 years  Domain: Quality Engineering | Automation | Agile

Are you a QA enthusiast with a passion for leading from the front? Do you have the vision to define robust testing strategies and the skills to build frameworks from scratch? Then we want you on our team!

 What You'll Do: Own and define program-level test strategies and test plans

Lead and mentor a blended team of manual and automation QA engineers

Collaborate across teams to drive end-to-end testing efforts

Deliver high-quality QA artifacts: Coverage Reports, RTMs, Daily/Weekly Dashboards

Plan and strategize Non-Functional Testing (NFT) with confidence

Support automation efforts and solve blockers with technical insights

Thrive in an Agile environment, using JIRA, Zephyr/TestRail for test governance

 Tech Toolbox: Languages: Java (strong hands-on), JavaScript (bonus)

## Frameworks & Tools:

API: Rest Assured, Karate

UI: Selenium, Cypress, Playwright

Testing: JUnit, TestNG

CI/CD: TeamCity, GitLab

Others: Service Virtualisation, JIRA, Zephyr/TestRail

🌟 You Are: A strategic thinker with a hands-on mindset

A leader who inspires quality ownership across the board

A collaborator who thrives in fast-paced Agile setups

An innovator who's not afraid to dive into frameworks and code

If this sounds like your next challenge, let's connect!

✉️ Drop us a message or apply at [sneha.k@2coms.com](mailto:sneha.k@2coms.com)

We are **#hiring**

Position: **#UFT** Architect

Location: Hyderabad, Bangalore, Pune

Experience: 10+ Years

Job Description:

We are seeking an experienced **#UFTArchitect** with a strong background in test automation and architectural best practices. The ideal candidate will have deep expertise in **#UFT** and experience designing and implementing scalable automation frameworks in enterprise environments.

## Key Responsibilities:

Lead the design and development of robust **#UFTautomation** frameworks for **#web**, **#desktop**, and **#API** testing.

Integrate UFT with Micro Focus **#ALM**, **#Jenkins**, or **#Azure #DevOps** to enable **#CI/CD** pipelines.

Collaborate with **#QA** leads, **#developers**, and stakeholders to define and implement test strategies aligned with project goals.

Provide technical leadership and mentorship to automation engineers across teams.

Ensure effective test data and environment management practices.

Drive adoption of test automation best practices and tools across Agile and Waterfall delivery models.

Develop and execute **#APITest** cases using UFT or alternative tools like **#Postman** and **#SoapUI**.

Support continuous improvement initiatives in automation strategy and architecture.

## 2. Required Skills and Experience:

10+ years of overall experience in **#QualityAssurance** and **#TestAutomation**.

5 years of hands-on experience with UFT **#UnifiedFunctionalTesting**.

Proficient in integrating **#UFT** with Micro Focus **#ALM**, **#Jenkins**, or **#Azure #DevOps**.

Experience with **#APITesting** using **#UFT**, **#Postman**, or **#SoapUI**.

Strong understanding of test data management and environment management practices.

Proven experience working in both **#Agile** and **#Waterfallmethodologies**.

Excellent communication and stakeholder management skills.

This document is for Subscribed Members only. If you notice this is shared publicly by anyone  
pls report to us on [info@jobcurator.in](mailto:info@jobcurator.in) or whatsapp +91 9014875399

- Defect Tracking and Resolution:
  - Identify, document, and track defects found during testing.
  - Work closely with the development team to troubleshoot and resolve issues.
- Test Documentation:
  - Create and maintain detailed test plans, test cases, and test data.
  - Document test results and provide clear, actionable feedback to the development team.
- Quality Assurance Best Practices:
  - Stay updated with the latest industry trends in test automation and QA practices.
  - Advocate for quality within the team and help drive improvements in the software development process.

Required Skills:

- Programming Languages: Proficiency in programming languages such as Java, Python, or C#.
- Test Automation Tools: Experience with automation tools like Selenium, Appium, JUnit, TestNG, or similar.
- CI/CD Tools: Hands-on experience with CI/CD tools like Jenkins, GitLab, or Azure DevOps.
- API Testing: Strong understanding of RESTful APIs and experience with API testing tools like Postman or RestAssured.

Preferred Qualifications:

- Experience in Agile/Scrum development environments.
- Familiarity with cloud platforms such as AWS, Azure, or Google Cloud.
- Experience with performance and load testing tools like JMeter or LoadRunner.
- Knowledge of SQL and database testing.

Educational Requirements:

- Bachelor's degree in Computer Science, Engineering, or a related field.

 We're Hiring: Web Application Security Tester

 Location: Chennai

 Job Type: Full-Time | Permanent

 Qualification: BE / B.Tech

## Experience: 2–4 Years

Are you passionate about cybersecurity and protecting applications from ever-evolving threats? We're looking for a Web Application Security Tester to join our team and help secure the backbone of our digital infrastructure.

 What You'll Do

As part of our cybersecurity team, you'll:

Perform security assessments and penetration testing of web applications.

Analyse dynamic scan reports using tools like Web Inspect and AppScan—and effectively eliminate false positives.

Use a variety of commercial and open-source tools such as Burp Suite, OWASP ZAP, sqlmap, Metasploit, and more.

Uncover and exploit vulnerabilities tied to business logic and frameworks.

Apply manual testing techniques to identify issues like SQL Injection, XSS, CSRF, and auth flaws.

Integrate security best practices into DevOps pipelines.

Create and communicate detailed security test plans and assessment reports.

Stay up to date with the OWASP Top 10 and emerging cyber threats.

## What We're Looking For

Solid hands-on experience in Web Application Security Testing, Vulnerability Assessment, and Penetration Testing.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>  
This document is for Subscribed Members only. If you notice this is shared publicly by anyone  
pls report to us on [info@jobcurator.in](mailto:info@jobcurator.in) or whatsapp +91 9014875399

Strong command of tools like Burp Suite, OWASP ZAP, and Kali Linux.  
Deep understanding of VAPT methodologies.  
An analytical mindset and a knack for solving complex security challenges.  
Strong communication skills—verbal and written.

🏅 Bonus Points For

Certifications like CEH, CISSP, or equivalent.  
A passion for cybersecurity research and continuous learning.

Job Role: QA Mobile

Experience: 3+Years

Location: Bangalore (WFO)

Joiner: Immediate

Key Responsibilities:

- Test Planning and Strategy:
- Develop comprehensive test plans and strategies for mobile applications across Android and iOS platforms.
- Design, implement, and execute test cases based on functional and technical requirements.

Requirements:

- Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent work experience).
- 3+ years of experience in mobile application testing, with a strong focus on both Android and iOS platforms.
- Hands-on experience with both manual and automated testing of mobile applications.
- Proficiency in using mobile testing tools like Appium, Espresso, XCUITest, and other relevant frameworks.
- Strong understanding of mobile app performance testing and the use of relevant tools.
- Knowledge of mobile security testing practices and tools.
- Experience with bug tracking tools (e.g., JIRA, Bugzilla) and version control systems (e.g.,

Git).

- Familiarity with Agile/Scrum methodologies and experience working in an Agile environment.
- Excellent problem-solving skills, attention to detail, and a proactive approach to testing.
- Strong communication skills, with the ability to work effectively in a collaborative, fast-paced startup environment.

Preferred Skills:

- Experience in a startup environment, understanding the challenges and pace of startup operations.
- Familiarity with cloud-based testing environments (e.g., AWS Device Farm, Firebase Test Lab).
- Experience with mobile analytics tools to track performance and user behavior.
- Knowledge of scripting languages like JavaScript, Python, or Java for test automation.

 We're Hiring: Senior API Test Automation Engineer  
 Bangalore (Onsite) |  Full-time

Are you a QA automation expert who thrives on designing robust API test frameworks and delivering bulletproof RESTful API validation? We're looking for a Senior API Test Automation Engineer with 7+ years of experience in software testing, including 5+ years in API automation using Java and Rest Assured, to join our growing team.

 What You'll Be Working On:

Automating RESTful API testing with Rest Assured + Java  
Validating secure endpoints using OAuth2, JWT, and API tokens  
Designing modular, scalable test frameworks with best practices (Data-Driven, Builder Pattern, custom assertions)  
Integrating test suites into CI/CD pipelines (GitLab CI, Jenkins)  
Simulating external services using WireMock/MockServer  
Supporting performance testing with JMeter/Gatling  
Analyzing failures, triaging bugs, and collaborating on root cause analysis

 Must-Have Skills:

- Advanced Java + TestNG/JUnit, Maven/Gradle
- Deep understanding of REST APIs, HTTP methods, and JSONPath
- Expertise in response validation, schema checks, and authentication workflows
- Hands-on with CI/CD integration and version control via Git
- Clear documentation and strong collaboration with dev & QA teams

 Bonus Points For:

Experience with Pact, schema validators, or contract testing  
Familiarity with Dockerized test environments  
Exposure to performance testing tools like JMeter

✉️ If you're passionate about high-quality automation, love solving complex QA challenges, and want to be part of a high-impact engineering team—we want to hear from you!

Or reach out directly to [yashdeep.singh@delphic.in](mailto:yashdeep.singh@delphic.in)

🚀 Join Us as a Quality Assurance Engineer- HR applications! 🚀

💡 Innovate | Analyze | Elevate 💡

Are you passionate about HR applications, AI-driven solutions, and cutting-edge technology? Do you thrive in Quality Assurance (QA), Business Analysis, Agile environments, and Integration projects? If so, this is the perfect opportunity for you!

### 🌟 Your Role at a Glance

As a Quality Assurance Engineer/Business Analyst, you will play a critical role in ensuring the seamless performance of HR applications, including Workday, Talent & Workforce, Learning & Development, and Salesforce. You'll collaborate with cross-functional teams, driving automation, AI testing, chatbot validation, and system integrations while ensuring the highest quality standards are met.

### 🛠 What You'll Be Doing

- ◆ Develop, implement, and optimize QA strategies for HR applications
- ◆ Perform AI & Chatbot testing to enhance intelligent automation capabilities
- ◆ Validate integrations across Salesforce, Workday, and other platforms
- ◆ Analyze business requirements and align test strategies with Agile methodologies
- ◆ Ensure smooth functionality of Workforce & Learning solutions through structured testing
- ◆ Collaborate with product teams to ensure user-friendly and efficient system enhancements
- ◆ Drive continuous improvement by leveraging AI-driven quality assurance methodologies

### ✓ What We're Looking For

- ✓ Expertise in HR applications (Workday, Talent & Workforce, Learning & Development)
- ✓ Strong background in Quality Assurance & Business Analysis
- ✓ Hands-on experience with AI-driven testing, chatbots, and automation frameworks
- ✓ Proficiency in Salesforce and Integration testing
- ✓ Solid understanding of Agile methodologies and CI/CD implementation
- ✓ Excellent analytical & problem-solving skills with an eye for detail
- ✓ Must be a qualified [B.Tech/B.E/ M.Tech/](#) MBA professional with 3+ to 7 years of relevant experience preferably in Bangalore. (Secondary location - Kolkata and Mumbai)

### 🌐 Why Join Us?

- ✨ Work with cutting-edge AI & automation technologies
- ✨ Make a direct impact on HR technology transformation
- ✨ Join a collaborative and innovation-driven team
- ✨ Gain exposure to enterprise-level HR applications & integrations
- ✨ Enjoy exciting growth opportunities and career progression.

✉ Aspirants who can join us Immediately or within 45 days are requested to inbox your profiles to [mangala.hanamshetty.tpr@pwc.com](mailto:mangala.hanamshetty.tpr@pwc.com) & [amarjit.roy@pwc.com](mailto:amarjit.roy@pwc.com) ✉

Job openings for Salesforce QA Tester-Contract

Location- Bangalore/Chennai/hyderabad

Exp-5-8 years

Job Description-

Enhance existing automation frameworks and scripts to accommodate new Salesforce features and releases.

Design, develop, and maintain a robust automation framework for Salesforce applications.

Identify test scenarios based on business requirements and Salesforce user stories.

Automate Salesforce UI, Functional, Integration, and End-to-End test cases using automation tools such as Selenium WebDriver, Java, TestNG, Maven, Jenkins, Git, and automation frameworks including Page Object Model (POM) and Keyword Driven Framework (KDD).

Extensive experience working with Salesforce CRM applications, especially Sales Cloud.

Strong hands-on experience with Salesforce-specific features, interfaces, Lightning components, and Salesforce APIs (REST/SOAP).

Track defects and assist development teams in activity-based root cause analysis.

Integrate automated tests into Continuous Integration/Continuous Delivery (CI/CD) pipelines and cloud platforms such as Jenkins or Azure DevOps.

Regularly monitor and maintain automated test suites to ensure stability in the Salesforce QA environment.

Plan and implement robust test data strategies suitable for Salesforce instances.

Manage and maintain test data for automation scripts, ensuring alignment with Salesforce application requirements.

Generate detailed automation reports and metrics for stakeholders on test coverage, test results, and quality improvements.

Maintain comprehensive documentation for test strategies, automation scripts, and test scenarios.

Actively participate in daily stand-ups, sprint planning, retrospectives, and other Agile ceremonies.

We are hiring for Embedded Software QA / Test Engineer

Location: Hyderabad

Shift Timing: Day Shift

Duration: Paramount

Joining: Immediate joiners

Minimum Experience: 5 Years Embedded Software QA / Test Engineer

Responsibilities:

- Develop and execute comprehensive test plans and test cases for embedded firmware and software, particularly for systems utilizing STM32 and SAM microcontrollers.
- Design, develop, and maintain automated test scripts and frameworks, potentially using scripting languages like Python.
- Perform functional, regression, performance, and stress testing on embedded systems.
- Identify, document, and track defects throughout the development lifecycle.
- Collaborate closely with firmware and application development engineers to understand system requirements, troubleshoot issues, and ensure test coverage.
- Participate in hardware bring-up, system integration, and validation activities.
- Utilize debugging tools such as JTAG, oscilloscopes, logic analyzers, DMMs, power supplies, and function generators to diagnose and verify issues.
- Develop and maintain test documentation, including test plans, test cases, and test reports.
- Work with real-time operating systems (RTOS) like FreeRTOS or similar, understanding their implications for testing.
- Test low-level drivers for peripherals such as UART, SPI, I2C, and other communication interfaces (e.g., CAN, Ethernet, USB).
- Validate GUI applications developed for testing system functionality, potentially using Qt/C++.
- Contribute to the improvement of QA processes and methodologies.
- Ensure that GUI designs for ATE and checkout systems effectively facilitate testing and validation.
- Test GUI features for monitoring, configuring, and controlling ATE hardware and the Device Under Test (DUT).

#### Required Skills:

- Bachelor's or Master's degree in Electrical Engineering, Computer Engineering, Computer Science, or a related field.
- Proven experience in software quality assurance or testing, preferably in embedded systems.
- Strong understanding of software testing principles, methodologies, and best practices.
- Proficiency in C and/or C++.
- Experience with microcontrollers, preferably STM32, SAM, and ARM architectures.
- Experience with testing embedded systems and debugging tools (e.g., JTAG, oscilloscopes, logic analyzers).
- Familiarity with real-time operating systems (RTOS).
- Knowledge of microcontroller peripheral interfacing (SPI, I2C, UART, etc.).
- Experience with version control systems (e.g., Git).
- Strong problem-solving, analytical, and debugging skills.
- Excellent communication and teamwork skills.
- Experience in the design and/or utilization of Automated Test Equipment (ATE) or checkout systems.
- Familiarity with GUI design principles and testing.

Interested candidates can apply [varalakshmi@rareminds.in](mailto:varalakshmi@rareminds.in)

## **#HiringAlert**

### Job Description

Job Title: Software Development Engineer in Test (Lead)

Location: Hyderabad, India

As a Software Development Engineer in Test (SDET) Lead, you will play a pivotal role in ensuring the quality and performance of our products through test automation and non-functional testing. You will collaborate closely with global teams to design, develop, and implement automated testing solutions, focusing on both API and web automation using Playwright, as well as performance testing with JMeter. Your expertise in data-driven testing and non-functional testing will be critical in enhancing our CI/CD pipeline and overall software quality.

### Key Responsibilities:

- Design, create, and execute automated tests using Playwright and TypeScript to ensure the functionality of our software features and user interfaces. This includes developing smoke tests, regression test suites, and contributing to the overall quality assurance process.
- Develop and execute data-driven testing strategies to ensure comprehensive test coverage.
- Perform non-functional testing, including performance testing using JMeter and google lighthouse, to assess system stability and scalability.
- Participate in ongoing product specification and code reviews to align testing efforts with product goals.
- Support various testing efforts, including functional, security, stress, and failure injection testing, with a focus on continuous improvement and innovation.
- You'll be responsible for actively participating in story grooming sessions, where you'll collaborate with the development team to clarify requirements, identify potential risks, and ensure that all test scenarios are accounted for.

### Qualifications:

- Experience: Minimum of 5 years of development and testing experience, with a strong emphasis on test automation and non-functional testing.
- Education: Bachelor's degree in Engineering, Computer Science, or a related field.
- Technical Skills:
  - Proficient in using Playwright for API and web automation.
  - Experience with data-driven testing methodologies.
  - Strong understanding of performance testing tools, particularly JMeter.
  - Familiarity with continuous integration/deployment (CI/CD) environments.
  - Knowledge of testing methodologies such as TDD, BDD, and ATDD in an agile setting.
  - Strong coding skills in scripting languages such as Python, JavaScript, C#, or Java.
  - Experience with DevOps tools such as Jenkins, Git, and Octopus Deploy.

### Preferred Qualifications:

- Experience with scanning tools like SonarQube, NDepend, or Fortify RDBMS, SQL, and

Job Title: Senior Corporate Trainer – SDET (Software Development Engineer in Test)

Location: Chennai / Hyderabad / Bangalore

Compensation: ₹2,00,000 per month

Experience Required: 10+ Years (Industry + Training)

**Job Summary:**

We are looking for an experienced and passionate Corporate Trainer – SDET with 10+ years of experience in Software Testing, Test Automation, and Software Development. The ideal candidate should have strong experience delivering corporate trainings across diverse industries, tools, and frameworks. This role involves designing and delivering engaging training sessions for working professionals and upskilling internal/external engineering teams.

**Key Responsibilities:**

Design, develop, and deliver customized training programs on SDET-related topics.  
Conduct both online and in-person training sessions for corporate clients.  
Prepare high-quality learning materials, hands-on labs, and case studies.  
Mentor trainees on real-time use cases and project-based assessments.  
Regularly evaluate training effectiveness and suggest enhancements.  
Stay up to date with industry trends and emerging technologies in test automation and DevOps.

**Skill Requirements:**

**Core Technical Skills:**

Strong foundation in Core Java / Python / C# (at least one is mandatory)

Automation tools: Selenium, Cypress, Playwright, TestNG, JUnit

BDD: Cucumber, SpecFlow

API Testing: Postman, Rest Assured  
Performance Testing: JMeter or Gatling  
CI/CD Tools: Jenkins, Git, Maven/Gradle, Docker  
Test Management Tools: JIRA, Zephyr, TestRail  
Exposure to Cloud Testing Environments (AWS/Azure/GCP)

#### Training & Soft Skills:

Proven experience in conducting corporate training sessions

Ability to train on full SDET lifecycle – from test planning to CI/CD automation

Strong communication and presentation skills

Proficiency in creating courseware, assessments, and feedback mechanisms

⭐ Job Opportunity: CPQ Testing Role | 5+ Years Experience | Bangalore / Hyderabad ⭐

🚀 Company: Future Forbes

📍 Location: Bangalore / Hyderabad

✍️ Role: CPQ Testing

🕒 Experience: 5+ Years

Future Forbes is looking for an experienced CPQ Testing Professional to join our growing QA team. If you have hands-on experience in testing CPQ applications (like Salesforce CPQ or Apttus CPQ) and a passion for quality and automation, we'd love to hear from you!

✓ Key Responsibilities:

Design and execute test cases for CPQ (Configure Price Quote) systems

Validate pricing rules, product configurations, and quote generation logic

Perform functional, regression, integration, and end-to-end testing

Collaborate with developers, business analysts, and QA team

Identify defects, track bugs, and ensure timely resolution

Work on automation frameworks to enhance test coverage

🎯 Required Skills:

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>  
This document is for Subscribed Members only. If you notice this is shared publicly by anyone  
pls report to us on [info@jobcurator.in](mailto:info@jobcurator.in) or whatsapp +91 9014875399

Strong experience in CPQ Testing (Salesforce CPQ, Apttus CPQ, or Oracle CPQ)

Solid understanding of pricing engines, quote flows, and approval rules

Experience with test automation tools (e.g., Selenium, TestNG, Postman)

Familiarity with Agile methodology and tools like JIRA or Azure DevOps

Strong knowledge of SDLC, STLC, and defect life cycle

Excellent analytical and communication skills

Knowledge of Salesforce platform is a strong plus

✉ Interested candidates, please share your resume at:

**#HIRING** for the Position of **#TestArchitect** with 10-15 years of Experience for Multiple locations

Please share your updated CV's to: [manisha.ommi@visionyle.com](mailto:manisha.ommi@visionyle.com)

\* Position: **#TestArchitect**

\* Experience: 10-15 years

\* Location: **#Bangalore, #Mumbai, #Pune, #Chennai, #Hyderabad, #Ahmedabad**

\* Mode of work: Hybrid

\* Mode of Interview: 2 Rounds (Virtual, F2F)

\* Notice Period: Immediate-15 days

\*\*\* Job Description:

-- Key Responsibilities:

- \* Architect, design, and implement end-to-end testing strategies across web (frontend), APIs (backend), and system-level integrations.
- \* Build and maintain test frameworks for automated, regression, and performance testing.
- \* Define KPIs such as Mean Time Between Failures (MTBF), Mean Time to Recovery (MTTR), and reliability benchmarks.
- \* Drive root cause analysis (RCA) processes for complex, production-grade failures.
- \* Collaborate with product managers, developers, DevOps, and security teams to ensure high product quality across the SDLC.
- \* Plan and implement testing for mission-critical components like payment gateways, cryptocurrency integrations, remittance flows, and security modules.
- \* Define test data strategy and environments that simulate real-world remittance and crypto transaction scenarios.
- \* Provide guidance to QA engineers, review test code, and ensure adherence to automation and CI/CD best practices.
- \* Bring insights from production monitoring, logs, and telemetry into the test lifecycle.

-- Must-Have Skills:

- \* 10+ years of experience in **#QA/ #SoftwareTesting**, with at least 3 years in a **#TestArchitect** or **#QA** Lead role.
  - \* Strong understanding of **#Backend** Systems (e.g., microservices REST APIs, databases) and **#Frontend** Technologies (e.g., React, Angular).
  - \* Proficient in **#Automation** Frameworks (**#Selenium**, **#Cypress**, **#Playwright**, etc.) and **#Scripting** Languages (**#Python**, **#JavaScript**, etc.).
  - \* Deep understanding of system reliability metrics: MTBF, MTTR, failure prediction, and failure impact analysis.
  - \* Familiar with tools like **#JMeter**, **#Postman**, **#NewRelic**, **#Grafana**, or similar for load and observability testing.
  - \* Experience in domains involving **#Payments**, **#Remittance** Systems, or **#Cryptocurrency** (Bitcoin).
  - \* Knowledge of secure transactions, compliance requirements, and encryption techniques.
-

We Are Hiring For 🚀 Business Analyst 🚀

17 Experience: 3 – 6 Years

📍 Location: Hyderabad

**Job Description:** We are looking for a highly skilled Business Analyst (BA) with expertise in Web Applications and Testing to join our team. The ideal candidate will have a strong understanding of business analysis processes, web-based applications, testing and quality assurance (QA) methodologies. This role requires collaboration with stakeholders, developers, and testers to ensure seamless delivery of high-quality software solutions.

#### Key Responsibilities:

- Gather, analyse, document business requirements and test for web applications.
- Work closely with stakeholders to understand and translate business needs into functional specifications.
- Collaborate with development and QA teams to ensure requirements are met and properly tested.
- Define and execute test plans, test cases, and scenarios for web applications.
- Conduct functional, regression, and user acceptance testing (UAT).
- Identify and document defects, working with developers to resolve issues.
- Assist in system integration testing and ensure proper deployment of web applications.
- Analyse user feedback and suggest improvements for better user experience (UX).
- Create process flows, wireframes, and use case diagrams as needed.
- Ensure compliance with industry best practices and security standards in web applications.

#### Required Skills & Qualifications:

- Experience: 3 to 8 years as a Business Analyst in web application projects.
- Strong knowledge of SDLC, Agile, and Waterfall methodologies.
- Hands-on experience in software testing, including functional and UAT testing.

- Familiarity with web technologies, databases, and APIs.
- Experience with tools like JIRA, Confluence, Postman, Selenium (preferred), or other testing frameworks.
- Excellent documentation and communication skills.
- Strong analytical and problem-solving abilities.
- Ability to work collaboratively in a fast-paced environment.

\*\*\*\*\*Hello Resources\*\*\*\*\*

Skill – Automation/Appium Tester

Location – Bangalore(Electronic City) & Pune (Hinjewadi)

Work Model – Hybrid

Experience – 5-7 Years

Automation/Appium Tester

Experience: Hands-on experience in Appium test automation for mobile applications (Android and IOS). Good to have exposure to Cloud based mobile testing platforms like BrowserStack

Interested candidates or any references please drop your resume

#[vishnupriya@costaffglobal.in](mailto:vishnupriya@costaffglobal.in)

Expertise in Appium: Serve as the go-to person for Appium, possessing in-depth knowledge of the framework, automation best practices, and the latest updates.

Test Automation Strategy: Develop and implement comprehensive test automation strategies using Appium for mobile application testing.

Collaboration: Collaborate with cross-functional teams, including developers, testers, and product managers, to integrate Appium effectively into the development and testing

workflows.

**Training and Mentorship:** Train and mentor team members on Appium, ensuring the broader team can leverage the framework efficiently.

**Tool Evaluation:** Continuously evaluate and recommend tools and technologies that enhance the Appium testing process.

**Script Development:** Create and maintain robust and scalable test scripts using Appium for various mobile platforms (iOS, Android).

**Troubleshooting:** Diagnose and resolve complex issues related to Appium automation, providing timely solutions to ensure smooth testing processes.

**Test Framework Development:** Contribute to the development and enhancement of test automation frameworks using Appium.

=====

**Role:** RPA UI Path Developer

**Location:** Pune, Bangalore & Chennai

**Experience:** 4-5 years

**Offer Rate:** INR 9.60 LPA

- **Analyse Business Processes:** Identify automation opportunities by analyzing business operations and workflows.
- **Design and Develop RPA Solutions:** Create, design, and implement RPA systems using the UiPath platform.
- **Automation Process Development:** Develop and configure automation processes as per defined requirements.
- **Testing and Debugging:** Test automation processes and fix any errors encountered during the testing phase.
- **Maintenance and Troubleshooting:** Maintain, troubleshoot, and improve existing RPA applications and systems.
- **Documentation:** Document the design, operation, and troubleshooting of RPA applications and systems.
- **Collaboration:** Work closely with other team members to ensure that RPA solutions are well-integrated into business processes.
- **Performance Monitoring:** Monitor the performance of RPA systems to ensure their stability and functionality.
- **Continuous Improvement:** Provide continuous advice and best practices to improve and optimize the RPA strategy

**Required Skills:**

- **Technical Proficiency:** Strong understanding of UiPath and its core functionalities.
- **Programming Skills:** Proficiency in programming languages such as C#, .NET, VB, or Java is a plus.
- **RPA Tools:** Experience with other RPA tools like Blue Prism, Automation Anywhere, etc., is a plus.
- **SDLC Knowledge:** Familiarity with the Software Development Life Cycle (SDLC).
- **Problem-Solving:** Strong analytical and problem-solving skills.
- **Communication:** Excellent verbal and written communication skills.
- **Project Management:** Ability to manage projects and deliver high-quality automation

solutions

Qualifications:

- Experience: 5 years of experience in RPA development, with a focus on UiPath.
- Education: Bachelor's degree in computer science, Information Technology, or a related field.
- Certifications: UiPath certification is highly desirable

ComUnus is #hiring for QA Tester!!

No Of Position : 4

Exp. Req : 3+ Yrs

Work Location : Mumbai ( Chembur )

Max NP : Immediate Joiners are preferred

Must Have Exp : Travel Domain

Preferred Candidate : Mumbai

Kindly Note : Immediate Joiners are preferred !!

Interested Candidates Share there CV on : [vidhi.bhatti@comunus.in](mailto:vidhi.bhatti@comunus.in) | 8591723284

#### Job Summary :

As a Junior Quality Analyst, you will play a key role in testing and validating our travel domain applications. You will work closely with senior QAs and developers to execute test cases, report bugs, and contribute to the continuous improvement of our quality assurance processes.

#### Key Responsibilities:

1. Test Execution: Execute manual & automation test cases and document results to ensure application functionality meets business and user expectations.
2. Defect Management: Identify, report, and track defects using defect management tools (JIRA, Mantis), ensuring timely resolution in collaboration with the development team.
3. Test Case Preparation: Assist in designing detailed test scenarios and test cases based on application requirements.
4. Testing Activities: Perform smoke, sanity, regression, and functional testing to validate application stability.
5. Automation Exposure: Learn and apply automation testing tools under the guidance of senior QA engineers.
6. Collaboration: Work closely with developers, senior QAs, and business analysts to understand system workflows and integration points.
7. Documentation: Maintain test documentation and contribute to refining QA processes.
8. Automation Coordination: Provide feedback to the Test Automation team on potential enhancements to the automation suite.

#### Required Skills & Qualifications:

Basic understanding of QA processes, including test planning, scenario creation, and execution for web and mobile applications.

Familiarity with defect tracking tools like JIRA or Mantis.

Exposure to automation tools such as Selenium or equivalent (a plus).

Basic SQL knowledge for database validation.

Strong analytical skills and attention to detail.

Eagerness to learn and adapt to new technologies and industry trends.

Good communication skills and ability to work effectively in a team-oriented environment.

🚀 Walk-in Drive – Automation SDET Role at Coforge | Gurgaon Location 🚀

Are you a passionate Test Automation Engineer looking to make a significant impact in a fast-paced environment? Join Coforge as we expand our QA team with skilled professionals who can transform manual testing into robust automated solutions.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

This document is for Subscribed Members only. If you notice this is shared publicly by anyone  
pls report to us on [info@jobcurator.in](mailto:info@jobcurator.in) or whatsapp +91 9014875399

We're looking for an experienced Automation SDET with 6+ years of hands-on expertise and immediate availability to join us in delivering high-quality, reliable software products.

- 📍 Location: Gurgaon
- 📅 Walk-in Drive: Saturday
- ✉️ Share Your Resume: [sonam\\_j@elgebra.com](mailto:sonam_j@elgebra.com)

#### 🔧 Key Responsibilities:

Design, build, and maintain scalable test automation frameworks and test suites  
Develop efficient, reusable test scripts in Python, JavaScript, or Java  
Implement functional, regression, and performance testing automation  
Integrate automation into CI/CD pipelines (Jenkins, CircleCI, etc.)  
Analyze test results and debug automation failures  
Collaborate with QA and development teams to define test strategies  
Maintain clear documentation of automation processes

#### ✓ Requirements:

6+ years in test automation development  
Strong skills in at least one scripting language (Python, JavaScript, Ruby)  
Hands-on experience with tools like Selenium, Cypress, Playwright, Appium  
Familiar with Git, CI/CD, and API test tools like Postman or RestAssured  
Solid understanding of QA processes and testing methodologies  
Strong analytical and problem-solving abilities

#### ⭐ Preferred Skills:

Experience with BDD frameworks (e.g., Cucumber)  
Knowledge of SQL/database querying for test data validation  
Familiarity with cloud testing platforms (AWS, Azure)  
Experience with test reporting and metrics analysis

🔍 We're looking for immediate joiners with 6+ years of experience in automation testing.  
Don't miss the opportunity to be part of a dynamic and growing QA team!

=====

Please find below job description. Kindly get in touch if you are interested.

Location:- Gurgaon  
QA – Big Data

#### Technical Skills:

Proficient in SQL and Linux with hands-on experience.  
Strong understanding of Hadoop ecosystem and job scheduling tools like Airflow and Oozie.  
Skilled in writing and executing SQL queries for comprehensive data validation.  
Familiarity with test automation frameworks (e.g., Robot Framework), with automation skills as an asset.

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

Basic programming knowledge in Python is a plus.

Experience with S3 buckets and cloud storage workflows is advantageous.

#### Soft Skills:

Strong analytical and problem-solving skills with a high attention to detail.

Excellent verbal and written communication abilities.

Ability to collaborate effectively in a fast-paced Agile/Scrum environment.

Adaptable and eager to learn new tools, technologies, and processes.

#### Experience:

2-5 years of experience in Big Data testing, focusing on both automated and manual testing for data validation and UI testing.

Proven experience in testing Spark job performance, security, and integration across diverse systems.

Hands-on experience with defect tracking tools such as JIRA or Bugzilla.

Thanks & Regards

Priyanka

Greetings from Shivilsys Softwares Pvt Ltd  
We are hiring Product Security Engineer..!!

Role: Product Security Engineer

Experience: 3+ Years

Location: Noida

#### Job Description:

Security Specialist in areas of Security Vulnerability Assessment & Penetration Testing.  
Responsible for periodic assessment and implementation of remediation with the help of node owners.

#### Job Key Tasks & Responsibilities:

- Experience in developing tailored Vulnerability Assessment Profiles in collaboration with clients, outlining assessment scope, methodologies, risk assessment criteria, and reporting structures.
- Have created and configured custom scan policies for vulnerability scanners, ensuring accurate, tailored scans to meet organizational needs and risk tolerance.
- Configure scan policies for full network scans, application scans, compliance checks, and sensitive data exposure detection.
- Performed both authenticated and unauthenticated scans across telecom networks and cloud environments (VNF, CNF). Troubleshooting and debugging scans.
- Performed automated and manual scans against the CIS Benchmarks (e.g., CIS AWS Foundations, CIS Linux, CIS Windows) to ensure compliance with industry best practices.
- Performed comprehensive risk triage by analyzing vulnerability reports, verifying false positives, and assigning accurate severity levels to vulnerabilities based on CVSS matrix.
- Evaluate the impact of vulnerabilities and prioritize vulnerabilities based on CVSS scoring and considering exploitability in telecom environments (e.g., SS7, Diameter, GTP, VoIP, IoT, 5G).
- Perform cloud-specific vulnerability assessments for containers and orchestration platforms (Docker, Kubernetes).
- Provide remediation recommendations based on scan findings, including patching, workarounds, configuration hardening, and compensating controls.
- Worked on remediation of non-compliant configurations and security issues based on CIS recommendations.
- Experience in threat intelligence gathering to identify known exploits and determine the current exploitation risk of vulnerabilities (e.g., availability of exploit POC, exploit in wild).
- Experience of working in ticketing tools i.e. ServiceNow, Jira.
- Proficiency in Linux, Windows, and cloud security hardening.
- Knowledge security frameworks and standards (e.g., NIST, ISO 27001, CIS)

#### Experience & Certification:

- Minimum 3+ years of relevant experience in a combination of security and operations technology jobs
- Vulnerability Scanning tools: Nessus, Qualys, OpenVAS
- Cloud Scanning Tools: Redhat ACS, Anchore, Trivy
- Ticketing Systems: Jira, ServiceNow, Remedy
- Telecom Expertise: Telecom architecture(2G,3G,4G,5G), Nokia Nodes and functionalities

Vinove is hiring for a QA Engineer (Automation).

Skills Required- Automation Testing, Selenium, Jenkins, API Testing, Postman, SQL, Functional Testing, Performance Testing, Load Testing, etc.

Exp Required- 3-5 yrs

Notice Period- early joiners will be preferred (15-20 days)

Location- Noida (Onsite)

If you are interested in the opportunity, kindly share your resume at

[ashwani.kumar1@vinove.com](mailto:ashwani.kumar1@vinove.com)

 We're Hiring: QA SDET Automation Engineer (Java/Selenium)

 Location: Remote (Open to candidates from Noida)

 Experience: 6+ Years

Are you a QA ninja with a passion for clean code, scalable test automation, and rock-solid frameworks? Do you dream in Java and wake up thinking about Selenium WebDriver? If yes, we want YOU on our team! 

 What You'll Be Doing:

- ✓ Build scalable, reusable test automation frameworks from scratch
- ✓ Collaborate with cross-functional teams to nail down test requirements
- ✓ Create and execute test scripts for web-based applications
- ✓ Debug and resolve automation issues like a pro
- ✓ Integrate your magic into CI/CD pipelines (Jenkins, GitLab, etc.)
- ✓ Be a key part of our Agile squad 

 What We're Looking For:

- ✓ 3–8 years of hands-on experience in Java + Selenium
- ✓ Strong command over Java, Selenium WebDriver, TestNG & Maven
- ✓ Familiar with CI/CD pipelines, Git, Jenkins
- ✓ Agile mindset & excellent problem-solving skills

 Bonus Points For:

- ★ Experience with cloud testing tools like Sauce Labs / BrowserStack
- ★ Familiarity with Docker & BDD frameworks (Cucumber, JBehave)
- ★ Testing certifications (ISTQB, CSTE)

 Mandatory 11-Point Background Verification:

- ✓ Education | ✓ Employment | ✓ Criminal | ✓ CIBIL
- ✓ ID | ✓ Reference | ✓ Address | ✓ CV Validation
- ✓ Gap Analysis | ✓ Credit | ✓ Database

#HIRING for the Position of #TestArchitect with 10-15 years of Experience for Multiple locations

Please share your updated CV's to: [manisha.ommi@visionyle.com](mailto:manisha.ommi@visionyle.com)

\* Position: #TestArchitect  
\* Experience: 10-15 years

Shared by **Job Curator** - Join us on Telegram: <https://t.me/testingexperiencedopenings>

- \* Location: #Bangalore, #Mumbai, #Pune, #Chennai, #Hyderabad, #Ahmedabad
- \* Mode of work: Hybrid
- \* Mode of Interview: 2 Rounds (Virtual, F2F)
- \* Notice Period: Immediate-15 days

\*\*\* Job Description:

-- Key Responsibilities:

- \* Architect, design, and implement end-to-end testing strategies across web (frontend), APIs (backend), and system-level integrations.
- \* Build and maintain test frameworks for automated, regression, and performance testing.
- \* Define KPIs such as Mean Time Between Failures (MTBF), Mean Time to Recovery (MTTR), and reliability benchmarks.
- \* Drive root cause analysis (RCA) processes for complex, production-grade failures.
- \* Collaborate with product managers, developers, DevOps, and security teams to ensure high product quality across the SDLC.
- \* Plan and implement testing for mission-critical components like payment gateways, cryptocurrency integrations, remittance flows, and security modules.
- \* Define test data strategy and environments that simulate real-world remittance and crypto transaction scenarios.
- \* Provide guidance to QA engineers, review test code, and ensure adherence to automation and CI/CD best practices.
- \* Bring insights from production monitoring, logs, and telemetry into the test lifecycle.

-- Must-Have Skills:

- \* 10+ years of experience in #QA/ #SoftwareTesting, with at least 3 years in a #TestArchitect or #QA Lead role.
- \* Strong understanding of #Backend Systems (e.g., microservices REST APIs, databases) and #Frontend Technologies (e.g., React, Angular).
- \* Proficient in #Automation Frameworks (#Selenium, #Cypress, #Playwright, etc.) and #Scripting Languages (#Python, #JavaScript, etc.).
- \* Deep understanding of system reliability metrics: MTBF, MTTR, failure prediction, and failure impact analysis.
- \* Familiar with tools like #JMeter, #Postman, #NewRelic, #Grafana, or similar for load and observability testing.
- \* Experience in domains involving #Payments, #Remittance Systems, or #Cryptocurrency (Bitcoin).
- \* Knowledge of secure transactions, compliance requirements, and encryption techniques.

Job Title: Web QA Engineer Intern

Duration: 3 Months (Unpaid)

Location: Kochi, Kerala

Opportunity for Full-time Position: Yes, based on performance

#### Job Summary:

We are seeking a detail-oriented and proactive Web QA Engineer Intern to join our team. The ideal candidate will be responsible for ensuring the quality and performance of our web applications through rigorous testing processes. This role requires a strong understanding of web technologies and testing methodologies. This 3-month unpaid Internship.

#### Key Responsibilities:

##### Testing and Quality Assurance:

- Perform functional, regression, and usability testing for web applications.
- Identify, document, and track bugs using bug-tracking tools.

##### Test Case Development:

- Write, review, and execute test cases, test plans, and test scripts.
- Maintain and update test documentation as the application evolves.

##### Collaboration:

- Work closely with developers, designers, and project managers to understand requirements and provide feedback on potential issues.
- Participate in sprint planning and review meetings.

##### Automation:

- Develop and maintain automated test scripts for routine tests (if applicable).
- Utilize testing tools for performance and load testing.

##### Performance Monitoring:

- Test the web application across different browsers, devices, and operating systems to ensure compatibility.
- Monitor website performance and identify areas for optimization.

##### Quality Metrics and Reporting:

- Provide regular reports on testing progress, defect rates, and application stability.

#### Required Skills and Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Familiarity with testing tools like Selenium, JIRA, Postman, or similar.
- Understanding of HTML, CSS, JavaScript, and basic web development concepts.
- Experience testing responsive web designs across multiple browsers and devices.
- Knowledge of QA methodologies, tools, and processes.
- Strong problem-solving skills and attention to detail.
- Basic understanding of Agile development practices.

Job Title: Test Automation Engineer (SDET)

Location: Gurgaon (Remote flexibility can be specified if applicable)

Experience: 4+ Years

Employment Type: Full-Time

Mandatory Skills: Automation Framework Experience, Strong Java SDET Programming

Job Description:

We are looking for a highly skilled Test Automation Engineer (SDET) with strong programming experience in Java and hands-on expertise in test automation frameworks. The ideal candidate will be responsible for designing, developing, and maintaining scalable test automation solutions to ensure software quality and reliability across all stages of development.

Key Responsibilities:

Design, develop, and maintain robust test automation frameworks.

Write clean, reusable, and efficient automation scripts in Java (and optionally other scripting languages).

Build comprehensive automated test suites for functional, regression, and performance testing.

Integrate automated tests into CI/CD pipelines using tools like Jenkins or similar.

Identify automation opportunities and transform manual test cases into automated tests.

Collaborate closely with developers, testers, and DevOps teams to define test requirements.

Analyze test failures and support debugging to resolve quality issues.

Maintain documentation for automated test processes and ensure best practices.

Optimize test execution time and maintain high code quality.

Required Skills & Qualifications:

4+ years of hands-on experience in test automation and SDET roles.

Strong programming skills in Java (mandatory).

Experience with automation frameworks such as Selenium, RestAssured, or any other modern frameworks.

Proficiency in test automation of APIs and UI components.

Familiarity with CI/CD tools like Jenkins, Git, etc.

Good understanding of software testing methodologies and QA processes.

Ability to troubleshoot and debug code and automation failures effectively.

Hiring Alert: Senior QA Automation Engineer (Remote)

We're looking for a seasoned QA Automation Engineer to join a high-impact team developing a serverless application supporting advanced student registration features. This app is crucial to the student experience and integrates with a wide range of connected systems.

Position: Senior QA Automation Engineer

Type: Long-term Contract

Location: 100% Remote

Key Technologies:

JavaScript, Playwright, Cucumber, WebDriver IO/Selenium

AWS (Lambda, DynamoDB, SQS)

Agile teams, QA strategy, CI/CD, Test Automation

You'll:

Lead test strategy for backend, frontend, and cloud-based infrastructure  
Troubleshoot asynchronous test failures  
Collaborate across technical & product teams  
Mentor team members on modern QA best practices

This role is mission-critical—you'll ensure quality and performance at scale during peak academic deadlines.

Interested or know someone who fits?

#sureshotcloser

Title: QA Automation Lead

Location: Dallas, TX (Remote)

Note: healthcare & Pharma domain must

Min Exp: 10+ Years.

As an Automation Lead you will work closely with the customer to understand test automation requirements, strategize automation initiatives, and coordinate with the offshore team to ensure successful test automation delivery. In addition to automation execution, the lead will oversee all automation-related responsibilities, ensuring quality and efficiency in testing processes.

**Key Responsibilities:**

- 8+ years of experience in software test automation, with at least 3 years in an automation lead role.
- Strong expertise in healthcare domain testing, specifically 340B Pharmacy Program workflows(good to have).
- Hands-on experience with test automation tools such as Selenium, Cypress, TestNG, Cucumber, or similar.
- Proficiency in programming languages like Java, Python, or JavaScript for automation scripting.
- Experience working with API testing and automation using tools like Postman, RestAssured, or Karate.
- Strong knowledge of test management tools (JIRA, TestRail, HP ALM, etc.).
- Exposure to CI/CD pipelines (Jenkins, GitHub Actions, Azure DevOps) and version control tools (Git).
- Ability to work independently onsite while effectively coordinating with offshore teams.
- Excellent communication and stakeholder management skills.
- Experience with performance testing and security testing is a plus.
- Experience with cloud platforms (AWS, Azure, GCP) and healthcare application hosting.
- Understanding of HL7, FHIR standards, and HIPAA compliance.
- Familiarity with 340B pharmacy operations, third-party administrators (TPAs), and drug inventory tracking.
- Act as the primary onsite automation POC, engaging with stakeholders to gather and refine automation requirements.
- Define the test automation strategy and roadmap, aligning with business objectives and customer needs.

- Work closely with the offshore team, providing clear requirements, reviewing deliverables, and ensuring successful automation execution.
- Oversee test automation framework design, development, and implementation for healthcare applications, with a focus on the 340B Pharmacy Program.
- Conduct code reviews, optimize test scripts, and drive automation best practices to enhance efficiency.
- Collaborate with cross-functional teams (developers, business analysts, and QA teams) to ensure seamless integration of automation testing.
- Provide guidance on CI/CD integration and automation execution within the software development lifecycle.
- Track and report automation progress, test coverage, and defect metrics, ensuring continuous improvement.
- Stay updated on healthcare compliance standards and ensure automation aligns with industry regulations.

Job Title: Automation Testing Analyst (Remote - USA)

Location: Remote (USA)

Job Type: Full-Time

#### Role Overview:

As an Automation Testing Analyst, you will be responsible for designing, developing, and executing automated test scripts to ensure the quality and reliability of software applications. You will collaborate with cross-functional teams to identify testing needs, improve automation frameworks, and enhance software quality processes.

#### Key Responsibilities:

Develop and maintain automated test scripts using tools such as Selenium, Cypress, or Playwright.

Perform functional, regression, performance, and API testing.

Design and implement test automation frameworks to improve efficiency.

Work closely with developers to identify and resolve software defects.

Integrate test automation into CI/CD pipelines using tools like Jenkins, GitLab CI/CD, or Azure DevOps.

Conduct manual testing when necessary to ensure comprehensive test coverage.

Document test plans, test cases, and test results for tracking and reporting.

Collaborate with product managers, developers, and business analysts to understand requirements and acceptance criteria.

#### Qualifications:

5+ years of experience in automation testing.

Strong proficiency with Selenium WebDriver, Cypress, or Playwright.

Hands-on experience with Java, Python, or JavaScript for test automation.

Familiarity with API testing using Postman, REST Assured, or SoapUI.

Experience with performance testing tools like JMeter or LoadRunner.

Knowledge of CI/CD pipelines and integration of automated tests.

Experience working in Agile/Scrum environments.

Strong analytical and problem-solving skills.

#### Preferred Skills:

Experience with cloud-based testing tools (AWS Device Farm, Sauce Labs, BrowserStack).

Knowledge of BDD frameworks like Cucumber or SpecFlow.

Familiarity with containerization technologies (Docker, Kubernetes).  
ISTQB certification is a plus.

If you are interested in this exciting opportunity, please send your resume

**Job Title:** QA Automation

**Job Location:** Remote

**Experience Required:** 3-5 years

#### **Job Description:**

We are looking for a skilled and detail-oriented QA Automation Engineer with 3–5 years of hands-on experience to join our remote team. In this role, you will be responsible for designing, developing, and executing automated test scripts to ensure the quality and reliability of our software products. You'll work closely with developers, product managers, and other QA team members in a fast-paced, agile environment.

#### **Key Responsibilities:**

Develop, maintain, and execute automated test scripts for web and/or mobile applications. Collaborate with development and QA teams to identify test requirements and implement automation solutions.

Integrate automated tests into CI/CD pipelines.

Analyze test results, report defects, and track them to resolution.

Maintain and improve existing test automation frameworks.

Ensure thorough test coverage and documentation.

Participate in code reviews and provide feedback on testability.

#### **Required Skills & Qualifications:**

3–5 years of experience in QA Automation.

Strong programming skills in languages such as Java, Python, or JavaScript.

Hands-on experience with automation tools such as Selenium, Cypress, Playwright, or similar.

Experience with API testing tools like Postman, REST Assured, or similar.

Familiarity with CI/CD tools (e.g., Jenkins, GitLab CI/CD, GitHub Actions).

Understanding of Agile/Scrum methodologies.

Excellent analytical, problem-solving, and communication skills.

Ability to work independently and manage time effectively in a remote setup.

#### **Nice to Have:**

Experience with performance or load testing tools (e.g., JMeter, Gatling).

Exposure to cloud environments (AWS, Azure, etc.).

Experience testing mobile applications.

**#CICD #QA #Cloud**

If you're passionate about front-end innovation and looking to work remotely with a talented team, we'd love to hear from you!
